EXPERTISE SKILLS

Programming Language

PHP (Laravel), C++, Java (basic),
Python (basic), HTML, CSS,
JavaScript, Bash

Database

MySQL, MariaDB, Postgres

DevOps & Tools

Docker, Laravel Herd,
DBngin, Linux. Nutanix HCI,
Web & DB Servers
Laravel Pest

Version Control

GitHub (Actions, Hooks)
GitLab (basic)
Git

LANGUAGE SKILLS

Bahasa Melayu

English

Tamil

WORK EXPERIENCE

Nindatech Sdn. Bhd

SENIOR SOFTWARE DEVELOPER

04/2025 - Present

- Build and maintain RESTful APIs for client-facing web applications using Laravel
- Lead backend development on Eventilla (eventilla.com), migrating from a legacy PHP MVC framework (circa 2011) to a modern Laravel + React stack
- Optimized a critical database query, reducing page load time from ~20 seconds to ~3 seconds
- Implemented event management APIs and rebuilt a lost RBAC system from an early migration phase
- Developed an internal CLI-based developer tooling system for automated file/folder mapping and configuration deployment across projects
- Containerized development environments using Docker
- Actively practice AI-assisted development workflows as part of client's requirement to improve delivery speed and code quality

MAJLIS BANDARAYA PULAU PINANG - IT DEPARTMENT

ASSISTANT IT OFFICER

10/2022 - 04/2025

- Built and maintained internal web applications tailored to council operational requirements
- Designed and optimized MySQL databases to ensure efficient data access and storage
- Managed web and database servers on Nutanix HCI; handled setup, monitoring, and security configurations
- Bridged communication between technical and non-technical stakeholders on IT project workflows
- Provided application support and troubleshooting for internal users

AIMSITY

PROGRAMMING TRAINER

05/2022 - 10/2022

- Planned, prepared, and delivered structured programming lessons based on lesson plans
- Developed project-based learning modules to reinforce coding concepts in students.

PROJECTS AND EXPERIENCE

Eventilla Platform Migration

Laravel, PHP (legacy MVC), React, PostgreSQL, Docker

Backend migration of a live events management platform from a legacy PHP MVC framework (circa 2011) to Laravel. Implemented event management APIs, rebuilt RBAC, and continue to support and maintain the legacy system in parallel.

Government Sector HR System (Freelance)

Laravel, MySQL

Developed key HR modules including role-based access control, new employee hiring workflows, announcements, leave management, and multi-level approval flows for various staff applications.

Internal Developer Tooling System

node.js, Bash, CLI

Built an in-house CLI tool that automates file/folder mapping between projects using pre-defined rules. Developers upload configurations to an internal portal, define mappings, and deploy them to any target project with a single command.

BTMHelpdesk Ticketing System

Laravel, MySQL

Developed and deployed a helpdesk support ticket system featuring secure authentication, dynamic calendar view for tickets, and modular permission management.

Document Management System Migration

Laravel, MySQL

Migrated a legacy file management system to a modern web application with structured file organization, improved access control, and enhanced security.

EDUCATION

10/2022 - PRESENT

Degree in Software Engineering - Part Time Studies
UTMSPACE

06/2018 - 08/2021

Diploma in Information Technology (Digital Technology)
Software/Programming Course 3.81 CGPA
Politeknik Balik Pulau

01/2013 - 12/2017

Secondary School
Penang Free School
SPM
